

WHAT IS CLAIMED IS:

- Sub  
A1
1. A method of managing document distribution services, the method comprising the steps of:
    - registering the document distribution services;
    - identifying at least one resource for each of the document distribution services, including defining at least one attribute of the at least one resource; and
    - monitoring an availability of the at least one resource for each of the document distribution services, including recording a status of the at least one attribute of the at least one resource.
  2. The method of claim 1, wherein the step of registering the document distribution services includes registering at least one of print services, electronic mail services, and publishing services.
  3. The method of claim 2, wherein the step of registering the document distribution services includes registering the print services, and wherein the step of identifying at least one resource for each of the document distribution services includes identifying at least one printer which provides the print services.
  4. The method of claim 3, wherein defining at least one attribute of the at least one resource includes defining at least one printer attribute of the at least one printer, and wherein recording the status of the at least one attribute of the at least one resource includes recording a status of the at least one printer attribute of the at least one printer.
  5. The method of claim 4, wherein recording the status of the at least one printer attribute of the at least one printer includes recording at least one of a quantity level of print medium for the at least one printer, a status of a print media path of the at least one printer, a quantity level of marking material for the

at least one printer, and a status of an input/output connection of the at least one printer.

6. The method of claim 2, wherein the step of registering the document distribution services includes registering the electronic mail services, and wherein the step of identifying at least one resource for each of the document distribution services includes identifying at least one electronic mail application which provides the electronic mail services.

7. The method of claim 6, wherein defining at least one attribute of the at least one resource includes defining at least one electronic mail attribute of the at least one electronic mail application, and wherein recording the status of the at least one attribute of the at least one resource includes recording a status of the at least one electronic mail attribute of the at least one electronic mail application.

8. The method of claim 7, wherein recording the status of the at least one electronic mail attribute of the at least one electronic mail application includes recording at least one of a status of a communication link of the at least one electronic mail application, a transfer rate of the at least one electronic mail application, and a delivery success rate of the at least one electronic mail application.

9. The method of claim 2, wherein the step of registering the document distribution services includes registering the publishing services, and wherein the step of identifying at least one resource for each of the document distribution services includes identifying at least one print service provider which provides the publishing services.

10. The method of claim 9, wherein defining at least one attribute of the at least one resource includes defining at least one print service provider attribute of the at least one print service provider, and wherein recording the status of the

at least one attribute of the at least one resource includes recording a status of the at least one print service provider attribute of the at least one print service provider.

11. The method of claim 10, wherein recording the status of the at least one print service provider attribute of the at least one print service provider includes recording at least one of a consumables inventory of the at least one print service provider and a lead time of the at least one print service provider.

12. The method of claim 1, further comprising the step of:  
generating an availability report of the document distribution services, including compiling the status of the at least one attribute of the at least one resource for each of the document distribution services.

13. The method of claim 12, further comprising the step of:  
distributing the availability report of the document distribution services to a system administrator.

14. A computer-readable medium having computer-executable instructions for performing a method of managing document distribution services, the method comprising:  
registering the document distribution services;  
identifying at least one resource for each of the document distribution services, including defining at least one attribute of the at least one resource; and  
monitoring an availability of the at least one resource for each of the document distribution services, including recording a status of the at least one attribute of the at least one resource.

15. A system for managing document distribution services, the system comprising:

a document distribution system controller configured to have the document distribution services registered therewith; and

an availability analysis system associated with the document distribution system controller and adapted to monitor an availability of the document distribution services, wherein the availability analysis system is adapted to record a status of at least one attribute of at least one resource for each of the document distribution services.

16. The system of claim 15, wherein the document distribution services include at least one of print services, electronic mail services, and publishing services.

17. The system of claim 16, wherein the document distribution services include the print services, and wherein the availability analysis system is adapted to record a status of at least one printer attribute of at least one printer configured to provide the print services.

18. The system of claim 17, wherein the availability analysis system is adapted to record at least one of a quantity level of print medium for the at least one printer, a status of a print media path of the at least one printer, a quantity level of marking material for the at least one printer, and a status of an input/output connection of the at least one printer.

19. The system of claim 16, wherein the document distribution services include the electronic mail services, and wherein the availability analysis system is adapted to record a status of at least one electronic mail attribute of at least one electronic mail application configured to provide the electronic mail services.

20. The system of claim 19, wherein the availability analysis system is adapted to record at least one of a status of a communication link of the at least

0988659 062904

ai

one electronic mail application, a transfer rate of the at least one electronic mail application, and a delivery success rate of the at least one electronic mail application.

21. The system of claim 16, wherein the document distribution services include the publishing services, and wherein the availability analysis system is adapted to record a status of at least one print service provider attribute of at least one print service provider configured to provide the publishing services.

22. The system of claim 21, wherein the availability analysis system is adapted to record at least one of a consumables inventory of the at least one print service provider and a lead time of the at least one print service provider.

23. The system of claim 15, wherein the availability analysis system is adapted to compile the status of the at least one attribute of the at least one resource for each of the document distribution services and generate an availability report of the document distribution services.

24. The system of claim 23, wherein the availability analysis system is adapted to distribute the availability report of the document distribution services to a system administrator.

25. The system of claim 24, further comprising:  
a communication network configured to link the document distribution system controller and the system administrator, wherein the availability analysis system is adapted to distribute the availability report of the document distribution services to the system administrator via the document distribution system controller and the communication network.
